

September 7, 2022

Dear Resident,

The City of Shallowater, along with a coalition of eleven area cities, will conduct aerial spraying for mosquitoes on Saturday and Sunday evening, September 10, 2022, and September 11, 2022.

- The plane will spray the City of Shallowater sometime during a time period starting at 6:00 p.m. on Saturday evening, September 10th, or Sunday evening, September 11th through the overnight hours, weather permitting. The actual time of spraying will be determined by where we fit in the line-up of cities. Actual spraying of the city should not take more than 30 minutes.
- Aerial spraying is particularly effective to reach areas in the city that truck-mounted sprayers cannot reach.
- Vector Disease Control International is the company that will be spraying. They specialize in aerial application, have been in business since 1992, and have over 40 offices across the United States. These products are being applied in strict accordance with label instructions as set forth and approved by the Environmental Protection Agency. The company is fully licensed and certified by Federal monitoring agencies. Visit [www.vdci.net](http://www.vdci.net) or [www.nmapestworld.org](http://www.nmapestworld.org) for more information about the company.
- The product used will be Perm-X UL 31-66; visit [www.clarke.com](http://www.clarke.com) for product information.

Thank you for your patience with this process! The City of Shallowater is committed to the health and safety of our citizens.

Please do not hesitate to contact City Hall at 806-696-4300 if you have any questions.
